Annex 4 Description of variables

Variable name	Category / unit
Protest participation/intention (overall)	1 = participated or would participate in authorized and/or unauthorized demonstrations; 0 = otherwise
Authorized demonstrations participation/intention	1 = participated or would participate; 0 = would never
Unauthorized demonstrations participation/intention	1 = participated or would participate; 0 = would never
Willingness to protest for wage increases and better working conditions	1 = high willingness; 0 = low willingness; derived from 1–10 scale
Willingness to protest for improving health and education	1 = high willingness; 0 = low willingness; derived from 1–10 scale
Willingness to protest for natural resource exploitation (2015) / climate change (2020)	1 = high willingness; 0 = low willingness; derived from 1–10 scale
Willingness to protest to defend democratic rights	1 = high willingness; 0 = low willingness; derived from 1–10 scale
Occupation status	Unemployed , Employed , Student; coded* categories
Self-rated socioeconomic status (reversed)	1–5; higher = better status
Age	Continuous (years)
Sex at birth	Male, Female
Educational attainment	No education, Primary, Secondary, and Higher education; coded
Social media use	survey-coded; Yes, No
Left–right ideological self-placement	0–10; higher = more right-wing
Feels close to a political party	Yes, No

Religious affiliation/belief	1= religious; 0 = non-religious
Trust Index (IRT score)	Continuous latent score (higher = greater trust in public institutions)
Satisfaction Index (IRT score)	Continuous latent score (higher = greater satisfaction/fairness regarding public goods and services)
Gini coefficient (2014, 2019)	0 = complete equality; 100 = complete inequality.
Public education spending, % of GDP (2014, 2019)	% of GDP
Trade openness, % of GDP (2014, 2019)	% of GDP
Employment Index (PCA score; 2014, 2019)	Continuous composite index (higher = better employment conditions)
Institutional Development Index (PCA score; 2014, 2019)	Continuous composite index (higher = better institutional development)
Macroeconomic Index (PCA score; 2014, 2019)	Continuous composite index (higher = better macroeconomic conditions)

*Variables marked as “coded” were grouped or had their original scale direction reversed.
